

When it rains, it pours

“Our home. King Island, has some of the cleanest air in the world. Thanks to the strong westerly winds known as the the Roaring Forties, it rains on average 180 days per year. The character of Cloud Juice changes with temperature, from sweetly refreshing when chilled, to an elegant velvet when served at room temperature.”

Duncan McFie,
Founder

*Small batch rainwater from
King Island, Tasmania,
Australia*

Pioneering the trend for delicate carbonation, our new Cloud Juice Sparkling is characterised by its fine bubbles which help to bring out the nuances in the food and wine with which it is served.

Cloud Juice is a uniquely young water, comparable to white wines, with its clean, neutral taste and lighter weight. It is the perfect complement to light fish dishes, sushi, sashimi and delicate vegetarian cuisine.

When chilled serve between 8 and 12 degrees.

The perfect drop to bring out the best in a fine whisky.

Super-low minerality
- just 45mg/L (TDS)

Not just water, rainwater. Cloud Juice was a winner of the prestigious Fine Water Society's Taste and Design Awards 2021.

“Cloud Juice is a soft rainwater collected at one of the most remote places in the world. It has nice presentation and story that is hard to beat.”

Michael Mascha, Fine Waters. A Connoisseurs Guide to the World's most distinctive Bottled Waters.

Proudly served at Spain's **El Bulli Restaurant**, voted World's Best Restaurant a record five times.

9750 drops of pure rainwater in every bottle.
